Interested in a career that impacts human health through biomedical science? Or curious what that even means?
The growing field of clinical/translational research encompasses the myriad ways we apply biomedical research to the improvement of human health. Explore this exciting and timely topic with Introduction to Clinical/Translational Research, a four-day survey course in which undergraduate and graduate students are encouraged to relate their current scientific endeavors to a larger clinical/translational framework, and understand how basic biomedical research is eventually translated to improve population health. Exploring foundational concepts in biomedical research will offer an understanding of this important area of science, as well as help to clarify career goals. Space is limited. Please RSVP at the link below by 1/13/12.

What is Harvard Catalyst?
Harvard Catalyst | The Harvard Clinical and Translational Science Center is dedicated to improving human health by enabling collaboration and providing tools, training and technologies to clinical and translational investigators. Harvard Catalyst brings together the intellectual force, technologies, and clinical expertise of Harvard University and its affiliates and partners to reduce the burden of human illness.
