AT-A-GLANCE

BUSINESS & ENVIRONMENT

HARVARD BUSINESS SCHOOL
That's how many MBA students are interested in business and environment. Through cases and discussion, environmental content is included in a range of courses related to environment, energy, finance, real estate, technology, and operations, entrepreneurship, negotiation, social enterprise, and leadership. And involvement spans beyond the classroom to field-studies, IXP, student clubs, and events, and a campus-wide commitment to increasing our own environmental stewardship. Our students benefit from a deep collection of resources, including a network of accomplished alumni working in the field such as Warren Adams of Patagonia Sur, Carter Roberts and Andrew Murphy of World Wildlife Fund, and John Doerr and Aileen Lee of Kleiner, Perkins, Caufield & Byers. Learn more at www.hbs.edu/environment.

MBA CURRICULUM

13 Cases with environmental content in the first-year curriculum

13 Elective courses related to Business & Environment

971 Enrollment in elective courses related to Business & Environment. Courses include:
