Opportunity exists to generate publicly available longitudinal data to drive understanding of genetic mutations and find Precision Medicine cures

*Datasets have potential to include longitudinal data in the future
**Public/private information not available
***Serves as a portal also, has potential to include longitudinal data in the future

1. FoundationCore’s pediatric cancer data has been made public
The vast majority of precision medicine data initiatives are focused on the drug development value chain, with primary focus on research and discovery.

*Datasets have potential to include longitudinal data in the future
**Public/private information not available
***Serves as a portal also, has potential to include longitudinal data in the future

1. FoundationCore’s pediatric cancer data has been made public
Funding sources for precision medicine data initiatives vary across the ecosystem with Pharma / Life Science and Government driving most of the progress

*Datasets have potential to include longitudinal data in the future
**Public/private information not available
***Serves as a portal also, has potential to include longitudinal data in the future

1. FoundationCore’s pediatric cancer data has been made public
