

# Innovation and Competitiveness: Implications for Policy and Saudi Arabia

**Professor Michael E. Porter**

***Global Competitiveness Forum  
Riyadh, Saudi Arabia  
January 2011***

---

This presentation draws on ideas from Professor Porter's articles and books, in particular, [The Competitive Advantage of Nations](#) (The Free Press, 1990), "Building the Microeconomic Foundations of Competitiveness," in [The Global Competitiveness Report](#) (World Economic Forum), "Clusters and the New Competitive Agenda for Companies and Governments" in [On Competition](#) (Harvard Business School Press, 2008), and ongoing research on clusters and competitiveness. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means - electronic, mechanical, photocopying, recording, or otherwise - without the permission of Michael E. Porter. Further information on Professor Porter's work and the Institute for Strategy and Competitiveness is available at [www.isc.hbs.edu](http://www.isc.hbs.edu)

# What is Competitiveness?

- Competitiveness depends on the **productivity** with which a nation uses its human, capital, and physical resources.
  - Productivity **sets the sustainable standard of living** (wages, returns on capital, returns on natural resources)
  - It is not **what** industries a nation competes in that matters for prosperity, but **how productively** it competes in those industries
  - Productivity in a national economy arises from a **combination of domestic and foreign firms**
  - The productivity of **“local” or domestic industries** is fundamental to competitiveness, not just that of export industries

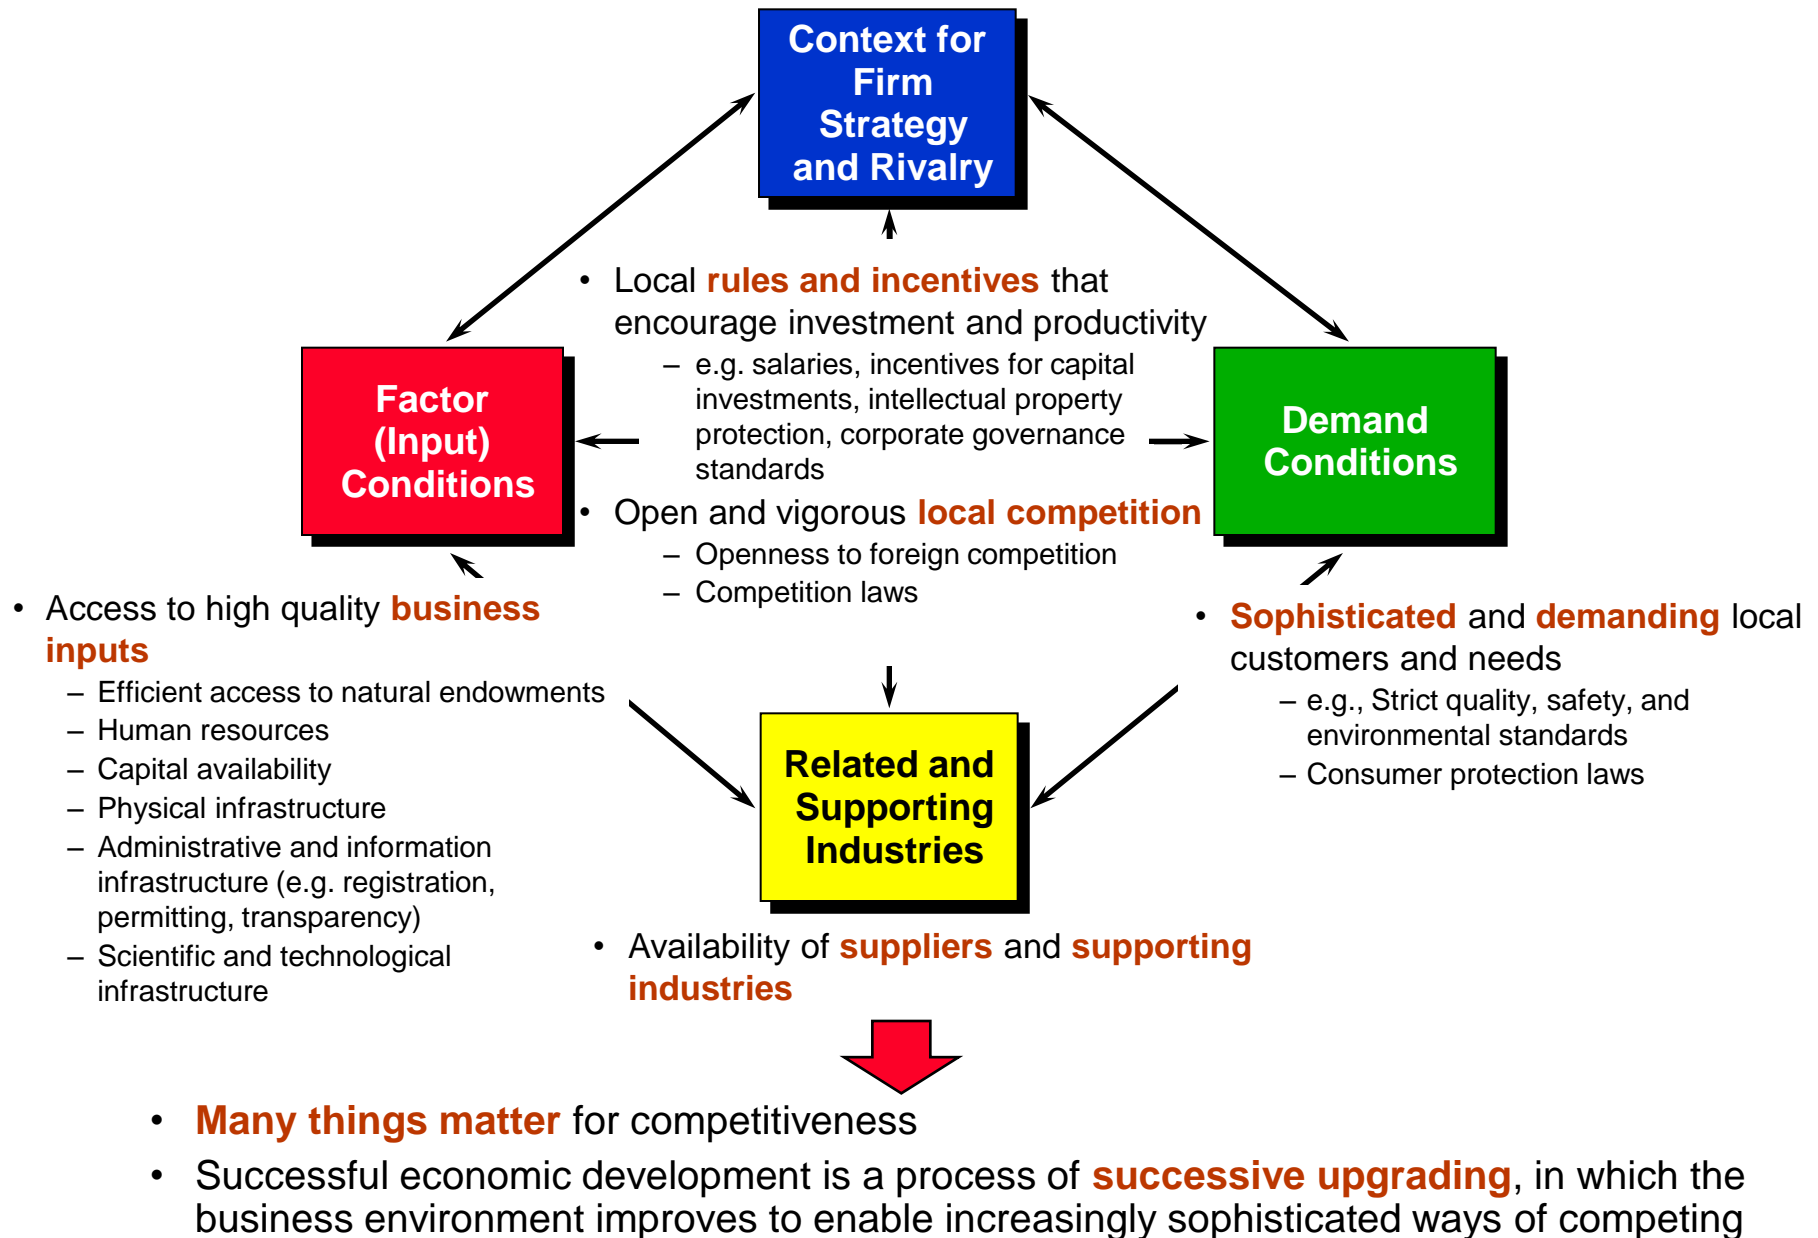

- Only **competitive** businesses can create jobs, rising income, and wealth
- Nations compete to offer the **most productive environment for business**
- The public and private sectors play **different but interrelated roles** in creating a productive economy

# Determinants of Competitiveness

- Endowments create a **foundation** for prosperity, but true prosperity is created by **productivity** in the use of endowments
- Macroeconomic competitiveness sets the **potential** for high productivity, but is **not sufficient**
- Productivity ultimately depends on improving the **microeconomic capability** of the economy and the **sophistication of local competition**

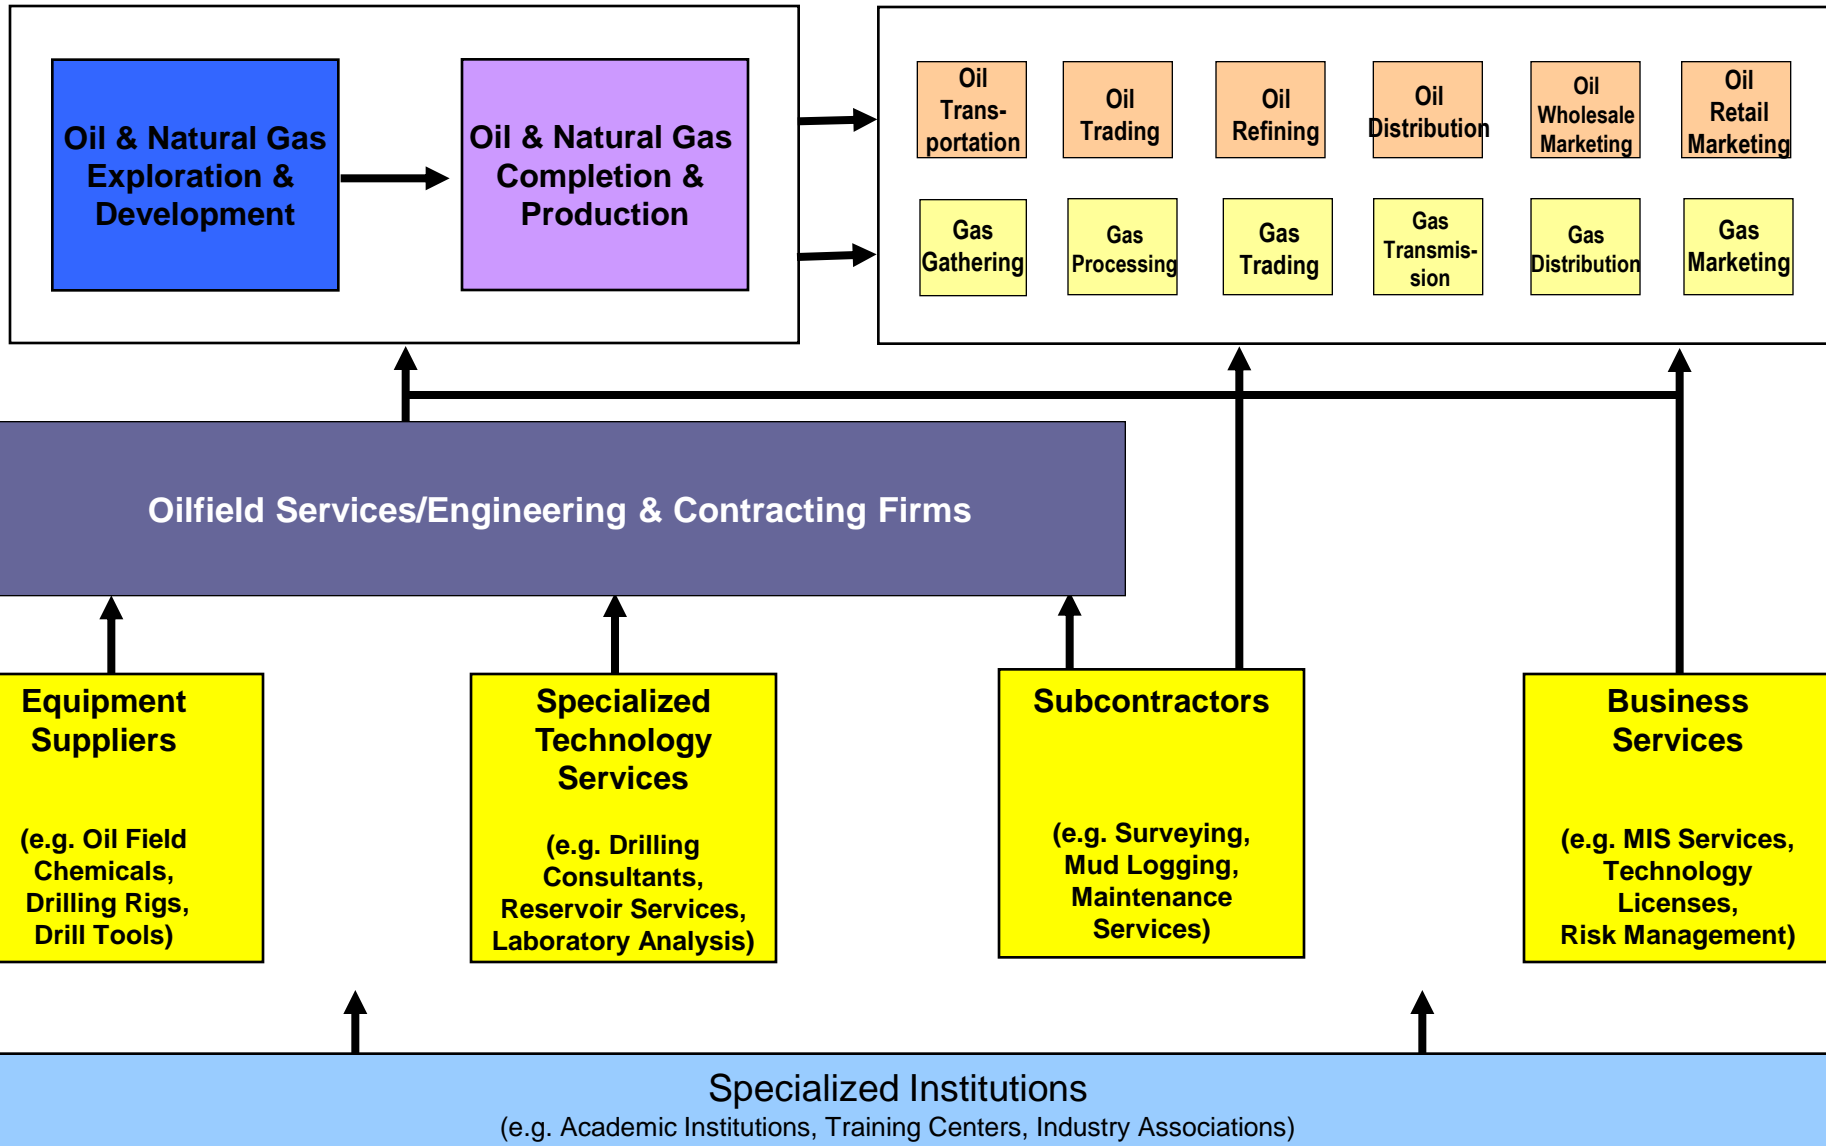

# Quality of the National Business Environment

# The Houston Oil and Gas Cluster

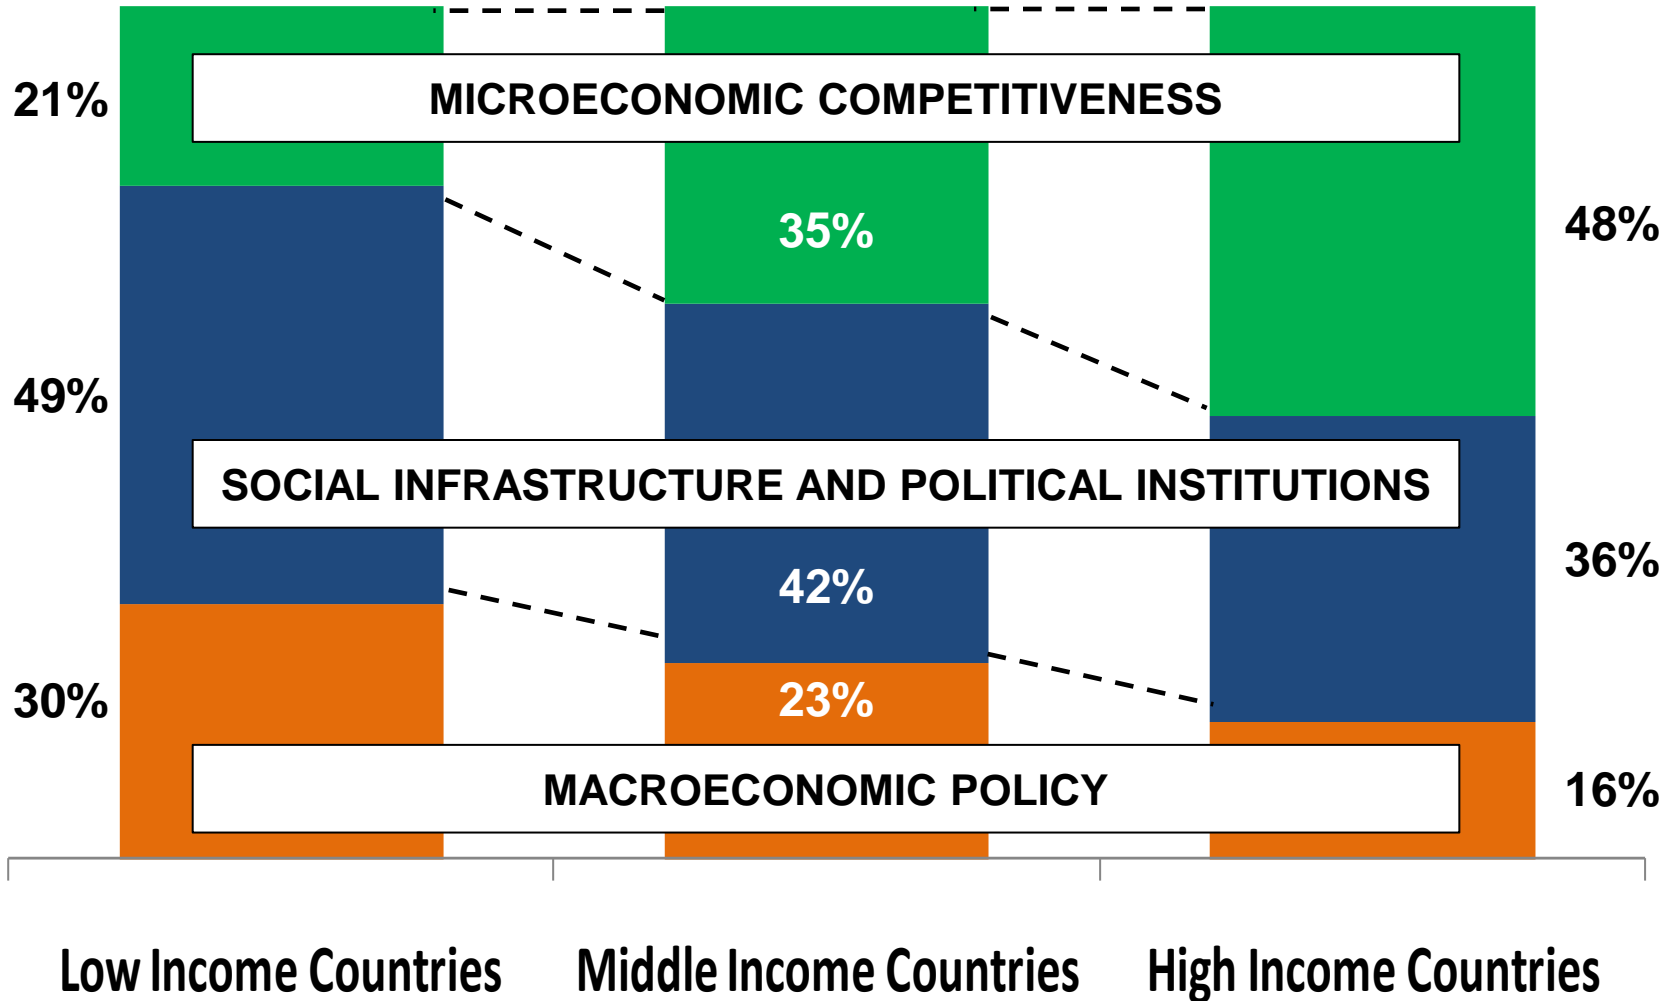

## Upstream

## Downstream

# Determinants of Competitiveness

## Relative Impact by Stage of Development

Notes: - Weights in a linear model across all economies: Micro: 0.31, SIPI: 0.41, Macro Policy: 0.28  
 - Middle-stage weights are an average of Low- and High-stage weights.

# Competitiveness Upgrading in Saudi Arabia, 2007 - 2010

## Macroeconomic Competitiveness

<i>Selected Survey Indicators</i>	<i>Improvement in Rank</i>
Decentralization of economic policymaking	+65
Business costs of corruption	+64
Quality of primary education	+42
Business costs of crime and violence	+42
Effectiveness of law-making bodies	+38
Freedom of the press	+34
Irregular payments by firms	+33
Judicial independence	+31
Transparency of government policymaking	+27
Reliability of police services	+23
Property rights	+23

# Transparency International Corruption Perception Index

## *Saudi Arabian Ranking Over Time*

# Competitiveness Upgrading in Saudi Arabia, 2007 - 2010

## Microeconomic Competitiveness

<i>Selected Survey Indicators</i>	<i>Improvement in Rank</i>
Procedures required to start a business	+89
Business impact of rules on FDI	+88
Regulation of securities exchanges	+78
Time required to start a business	+75
Restrictions on capital flows	+71
Stringency of environmental regulations	+67
Prevalence of trade barriers	+62
Protection of minority shareholders' interests	+61
Prevalence of foreign ownership	+59
Efficacy of corporate boards	+58
Low market disruption from state-owned enterprises	+57

# Progress on Business Regulation Leading Countries, 2006 - 2011

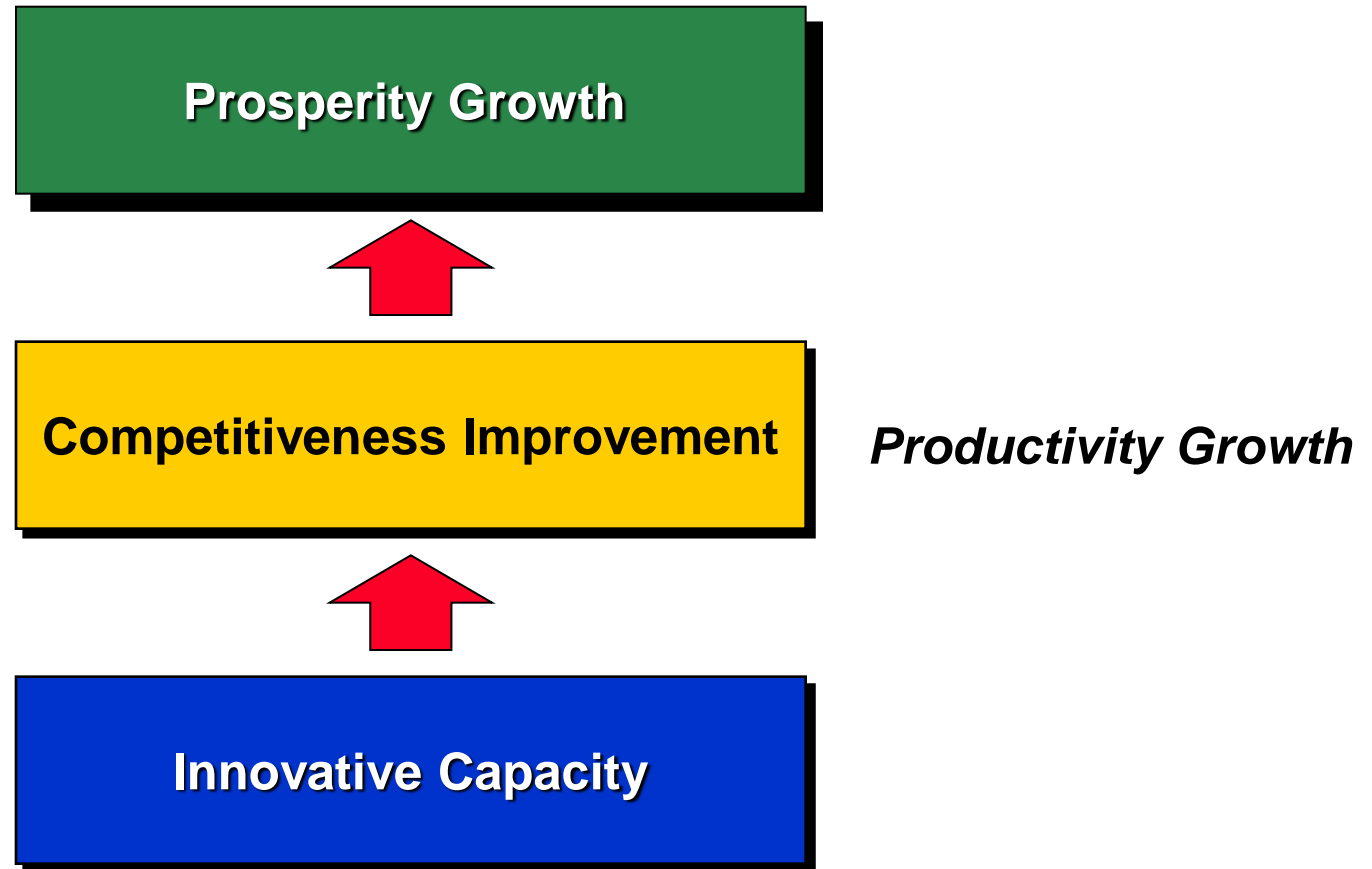

# Saudi Arabia's Progress on Competitiveness

- Competitiveness has become **central to Saudi Arabia's economic policy agenda**
- Programs like “10 by 10” have set **measurable goals** to motivate rapid progress
- Substantial reforms have been implemented in areas like **business regulation, education, and financial markets**.
- Large **investments** have been made to improve infrastructure, create economic cities, develop the petro-chemical cluster, and launch ambitious academic institutions like KAUST

- Significant competitiveness challenges **remain**
- But Saudi Arabia's position in international assessments of competitiveness has **improved markedly**

# Key Drivers of an Innovation-Driven Economy

- The innovative capacity of an economy depends on the **strength of each area** and on the **linkages** among them

# Common Innovation Infrastructure

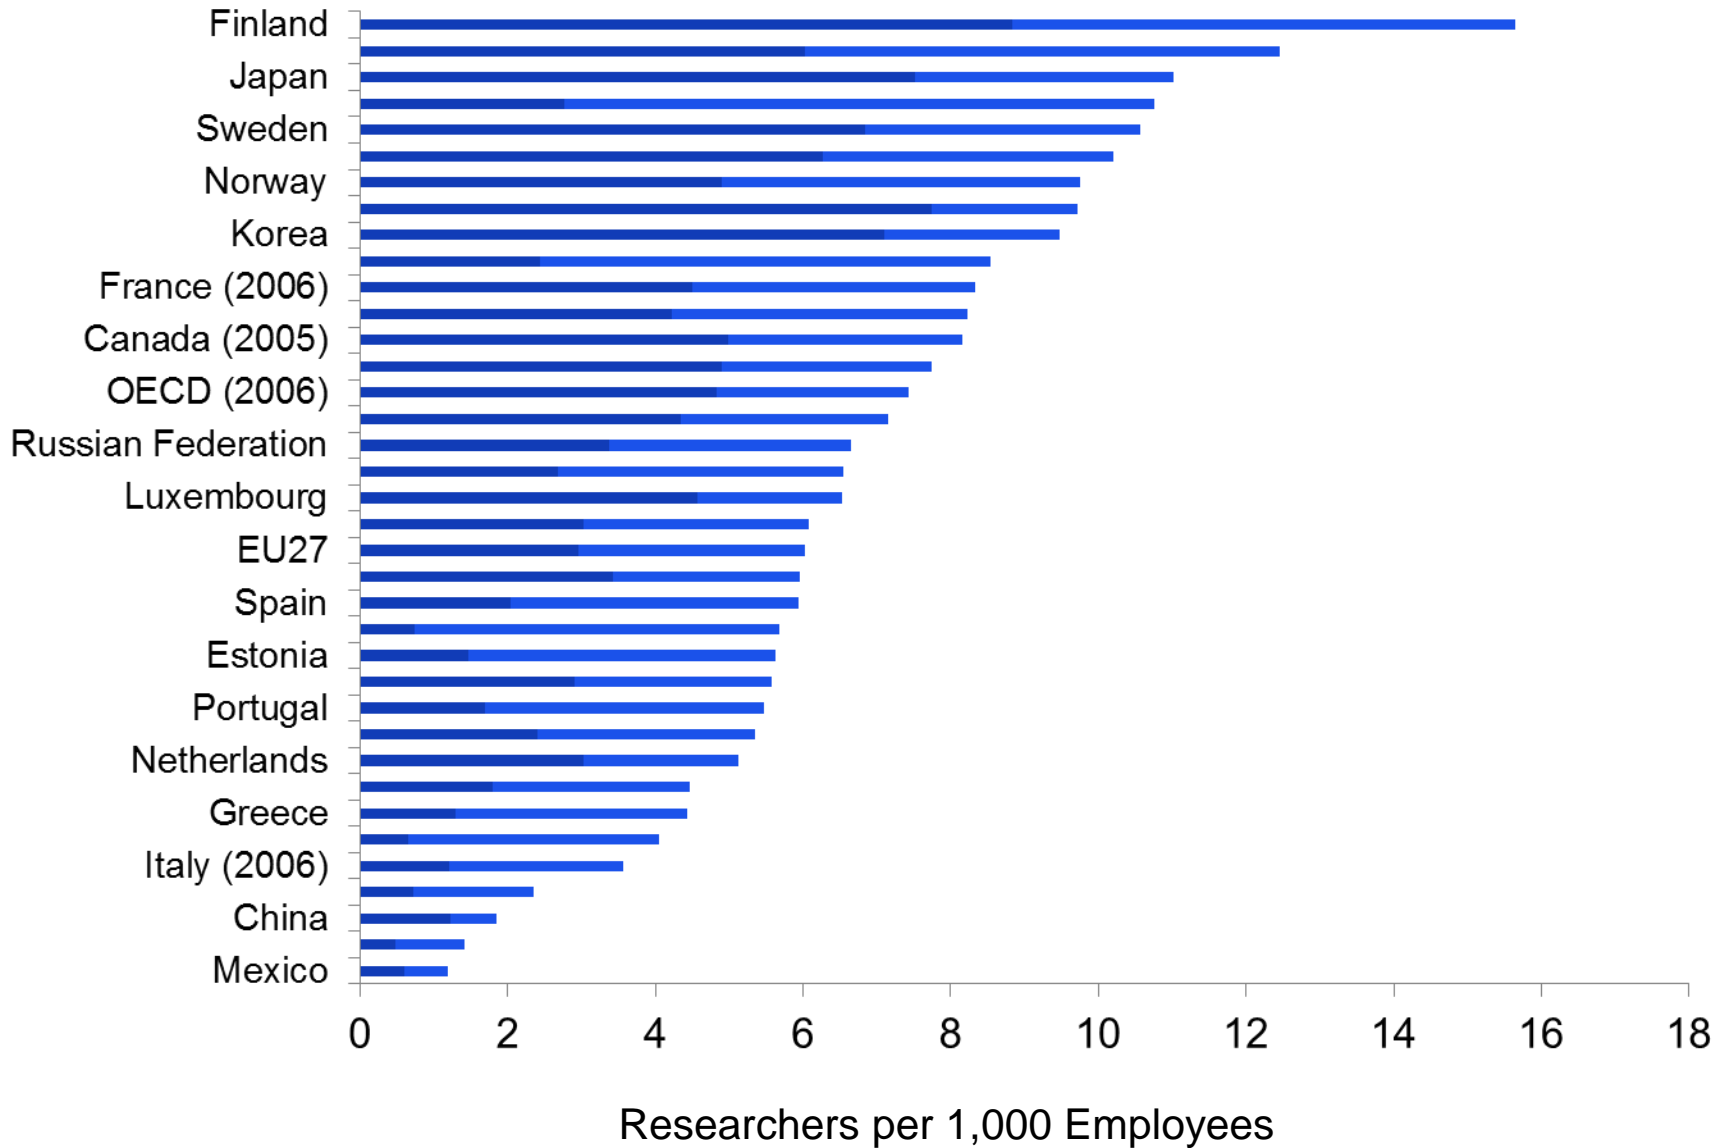

## Innovation Resources

- Science and engineering workforce
- Access to universities and postgraduate education
- Funding for basic science and technology
- Sophisticated Information Technology infrastructure

## Innovation Policy

- Intellectual property protection
- R&D incentives
- Government procurement of advanced products
- Openness to international trade and investment

# Science and Engineering Workforce

# Clusters and Innovation

- Clusters **increase productivity** and **operational efficiency**
- Clusters stimulate and enable **innovations**
- Clusters facilitate **commercialization** and **new business formation**

- Clusters reflect the fundamental importance to productivity and innovation of **linkages and spill-overs** across firms and associated institutions

# Institutions for Collaboration

## Selected Massachusetts Organizations, Life Sciences

### Life Sciences Industry Associations

- Massachusetts Biotechnology Council
- Massachusetts Medical Device Industry Council
- Massachusetts Hospital Association

### General Industry Associations

- Associated Industries of Massachusetts
- Greater Boston Chamber of Commerce
- High Tech Council of Massachusetts

### Economic Development Initiatives

- Massachusetts Technology Collaborative
- Mass Biomedical Initiatives
- Mass Development
- Massachusetts Alliance for Economic Development

### University Initiatives

- Harvard Biomedical Community
- MIT Enterprise Forum
- Biotech Club at Harvard Medical School
- Technology Transfer offices

### Informal networks

- Company alumni groups
- Venture capital community
- University alumni groups

### Joint Research Initiatives

- New England Healthcare Institute
- Whitehead Institute For Biomedical Research
- Center for Integration of Medicine and Innovative Technology (CIMIT)

# Capacity for Entrepreneurship

## Skills

- Entrepreneurship training
- Mentorship programs
- Entrepreneur networks

## Capital

- Risk capital providers
- Angel funding
- Tax policies encouraging risk capital

## Infrastructure

- Access to facilities, incubators
- Services for start ups (legal, accounting, HR)

## Policies

- Ease of incorporation
- Ease of doing business
- Bankruptcy laws

## Culture

- Public recognition of entrepreneurs
- Risks of failure

# Distribution of Saudi Arabian Innovation Output

# Selected Innovation Policy Initiatives

## Saudi Arabia

### Universities and Science Parks

- King Abdullah University of Science and Technology (KAUST)
- King Abdulaziz City for Science and Technology (KACST)
- King Fahd University of Petroleum and Minerals (KFUPM)
- KAUST Research Park and Innovation Cluster
- Dhahran Techno-Valley
- Riyadh Techno Valley

### Policies

- National Science, Technology & Innovation Plan (NSTIP)
- STC Venture Capital Fund
- Economic Offset Program
- The Centennial Fund
- SMEs Funding Guarantee Program
- Scientific Creativity Awards / Intel Int'l Science and Engineering Fair
- Mawhiba Young Leader Program

- Numerous government initiatives to support innovation

# Innovation in Saudi Arabia: Progress

- Significant efforts to improve **common innovation infrastructure**
- High dependence on expatriate skills and challenges in developing **local human resource capacity**
- Programs focused on leading global partners and high involvement of government, with the need to foster greater **grassroots efforts** involving a wide array of Saudi companies
- **Cluster development remains concentrated in** oil and industries and petrochemicals
- **Entrepreneurship** has only recently become a priority
- Innovation programs are in need of **greater coordination**

# An Innovation Agenda for Saudi Arabia

## The Next Steps

- Supplement leading edge research efforts with programs targeted at **mainstream Saudi companies**
  - Technology Transfer
- Improve **linkages** between academic institutions and companies
- Organize innovation policy more tightly around **clusters**
  - This will improve coordination across the large number of individual policy efforts to support innovation
- Launch comprehensive program to improve capacity for **entrepreneurship**

- Define a **distinctive role** for Saudi Arabia in the global innovation system

# Competitiveness and Innovation

- Competitiveness upgrading is a **critical priority** for every country – even more so after the recent crisis
- As economies progress, further gains in competitiveness increasingly require **innovation**
- Innovation occurs, where a strong **innovation infrastructure**, **dynamic clusters**, and an **entrepreneurial culture** are tightly connected
- Saudi-Arabia has over the last few years been **leading reformer**, significantly improving its competitiveness fundamentals
- To revive the **innovative traditions** of the Arab world, Saudi Arabia needs to deepen and diversify its cluster portfolio and create a more environmental climate
